

SKY ACID SP

Sky Acid Sp Is a product of acetic Acid replacement with a function as a buffer, so in the process or dyeing will make a stable pH . the usage will be more efficient so the cost of the production will be cheaper.

Special Feature **Sky Acid Sp** :

- ❖ Can sustain the pH in the process with Dyestuff
- ❖ Can neutralize process which using alkaline pH.
- ❖ The usage of concentrate will be smaller than Acetic Acid.
- ❖ High Temperature resistance exhaust process (130°C x 30').
- ❖ Will not change colour.

Characteristic :

Composition : As an organic acid
Form : Liquid (transparent)
Ionic : Anionic
pH : 1
Solid Content : 24

Usage : 0.1 gr / lt (pH 4.5 - 5)

Packing : 120 Kg
