

Sky Ant DK

Sky Ant DK is an agent used to control reduction reaction on Baking process, Steaming (fixation), in Dyeing or Printing process either, then colour yield can be matched as desired.

Special Feature :

- Can be used for Dyeing and Printing
- Can be used for reactive dyestuff, dispersion (dyestuff containing azo cluster)
- Help the stability of dyestuff in fixation process (Baking, Steaming)

General Characteristic

Form	Powder
Colour	Pale Yellow
Ionic	An – Ionic
pH	6 – 8 (1% larutan)
Solubility	Easily dissolved

Usage

1. Reactive Colour Agent

- For Dyeing process, effective usage is 1 : 2 or 1 : 1 with colour agent
- For Printing process, usage 1% from total colour pasta

2. Dispersion Colour Agent (Polyester Printing)

R/ Disp. Dye	u
Tartaric Acid	2
Sky Ant DK	10
Water	Y
Thickener	500
Total	1.000 gram
