

SKY ANTI MIGRASI FC

Sky Anti Migrasi FC is an anti migrasi used in continue dyeing for cellulose and its compunds.

SPECIAL FEATURE

- Avoiding listing.
- Improve levelling and fabric surface.
- Not form film layer which stick on Roll Padder.
- Easily wash
- Improving penetration and dye level.
- Prevent colour migration on fabric when drying.
- Dissolved first before adding to pad liquor.

Characteristic :

Type : Anionic

Composition : Liquid solution from Acrylic Polymer compound.

Form : Transparant liquid.

Solubility : Can be mixed by water to produce neutral solution.

Compatibility : Stable on water hardness and can be combined with anionic wetting agent.

APPLICATION

- ✓ **Sky Anti Migrasi FC** must be dissolved with 3-5 x water volume first before adding into pad liquor.
- ✓ For pre-dying without air space circulation on chimney (pre-dying abnormal condition), **Sky Anti Migrasi FC** concentration become 20 - 25 gr/lit.

STORAGE

Sky Anti Migrasi FC stable on normal storage,if keep the temperature below 0°C will become freeze but will returned into normal condition when reach room temperature. Product kept more than 12 months must be rechecked before used.

PACKING : 200 kg/ drum
