

SKY UNMIGRATION

Sky Unmigration is an anti migration agent used in continues dyeing for celluloce and its compound.

Special Feature **Sky Unmigration**

- Avoiding listing.
- Improving levelling and fabric surface.
- Doesn't make film layer which stucked on Roll Padder.
- Easilly wash
- Improve penetration and dye levelling.
- Prevent colour migration on fabric when drying.
- Dissolved before pouring into pad liquor.

General Characteristic **Sky Unmigration**

Type : Anionic
Composition : Liquid solution from Acrylic Polymer compound.
Form : Transparent liquid.
Solubility : Mixed with water to produce neutral solution.
Compatibility : Stable on betel lime water and can be clustered with anionic wetting agent.

APPLICATION **Sky Unmigration**

- ✓ **Sky Unmigration** must be dissolved with 3-5 x water volume before pour into pad liquor.
- ✓ For pre-dying without air circulation on chimney (abnormal pre-dying condition).
- ✓ **Sky Unmigration** using 20 - 25 gr/lit.

Storage **Sky Unmigration**

Keep at room temperature.

PACKING : 200 kg/ drum
